

Please do not interfere with established broadcast facilities by assignment of their existing frequencies to LPFM stations. I'm particularly referring to KLRD, KXRD, and K264AF. These outlets provide the community with wholesome programming choices 24 hours a day. We would have much less available to choose from if these stations are interfered with. Clean family programming is in the best public interest. Too much filth and perversion are already found on the public airwaves. Please find other frequencies for LPFM.
